To	CAR2B Prosecution Team	From	IAS CAR2 B
Date	03 October 2019		
Subject	Call Sequence Table for NGAISSONA's French number [+3376089006]		

1. TERMS OF REFERENCE

Request – CAR 2 B Prosecution team requested IAS to produce Call Sequence Tables ("CST") of communications referred to in the Prosecution Response to the Defence's Confirmation Submissions.

Methodology – Compilation and analysis of Call Data Records ("CDR") through specialised software (iBase, Mercure) and extraction of relevant phone data into CST.

CST – The CST present chronological sequences of calls between telephone numbers over a specific period of time. They include both voice calls and Short Message Service ("SMS"). Each table contains the following CDR information:

- **Start date:** Date of the communication, specified as dd/mm/yyyy.
- **Start time:** Time of the communication, specified in hh:mm:ss.
- **End1, End2:** Telephone numbers in contact during the communication. They do not reflect direction of the call (i.e. incoming vs. outgoing communication).
- **End1-Attr., End2-Attr.:** Attributed user of the telephone numbers involved in the call, as specified in Annex I.
- **Dur.:** Duration of the communication in seconds. When the type is not a voice call but an SMS, "SMS" will be indicated.
- **Source:** ERN of all relevant CDR containing records of the communication.

Caveats – IAS excluded from the CST all obvious instances of duplicate records of the same communication appearing in the original CDR. This was done to accurately account for the number of communications taking place and avoid double-counting.

2. CALL SEQUENCE TABLE for NGAISSONA's French number [+3376089006]: 216 records
